About Me

Results-driven Senior Test Automation Engineer and Test Manager with over 13 years of experience in QA Automation. Expert in architecting scalable BDD and TDD frameworks using Selenium, Playwright, and Appium. Proven track record of reducing manual testing effort by 80% and execution time by 50%. Deeply experienced in CI/CD integration, API testing, and leading cross-functional teams in Agile/DevOps environments.

Professional Experience

07/2021 – Present

Senior Test Automation Lead

Coforge GmbH, Frankfurt am Main

Key Responsibilities

- Working as Sr. Test Automation Lead with Deutsch Bahn NETZ company in Frankfurt as vendor.
- Develop and maintain test automation frameworks using BDD with Selenium(java), with an ongoing migration to Playwright (TypeScript) for enhanced automation capabilities, resulting in an 80% reduction in manual testing effort.
- Architected and implemented scalable automation frameworks (Playwright/Selenium + API tests), actively contributing scripts and enforcing standards through PR reviews and code governance.
- Led a QA team delivering UI, API, and integration testing, ensuring coverage across upstream and downstream services.
- Develop and maintain test automation frameworks using TDD Framework for RestAPI Automation.
- Drove automation KPIs and quality metrics, integrating tests into CI/CD pipelines and improving coverage, stability, and release confidence.
- Owned defect lifecycle and production quality, monitoring production issues, performing RCA, and reducing defect leakage.
- Managed a team of 8 QA Engineers, prioritizing tasks and conducting mentoring sessions for the team, additionally building roadmaps for increasing team's productivity keeping in mind individual success factors.
- Collaborated with Product Owners and Developers to ensure early defect detection and continuous quality management and control.
- Integrated automated testing into CI/CD pipelines with Jenkins, improving build and deployment efficiency.
- Conducted regular test audits, risk assessments, and quality metrics reporting to senior leadership.

11/2012 - 07/2021

Senior Test Automation Engineer

Tata Consultancy Services (Arline and Banking), Pune & Frankfurt am Main

Key Responsibilities

- Developed scalable frameworks using Selenium-Robot Framework and TestNG/Maven, reducing overall test execution time by 50%.
- Global Client Delivery: Delivered high-quality automation solutions for major airlines and financial institutions, including Lufthansa, British Airways, and Royal Bank of Canada.
- Agile Collaboration: Worked closely with Product Owners and BAs to define acceptance criteria and ensure 100% test coverage for user stories.
- Full Lifecycle Testing: Executed Functional, Smoke, Integration, Regression, and UAT Test Phases.

Educational Qualification

10/2008 – 06/2012

Bachelor of Engineering Electrical and Electronics Engineering

RGVP University (Bhopal, India)

Technical Qualification

Test Automation tools: Selenium WebDriver, Playwright, UFT, Appium, Winappdriver

Programming Languages: Java, JavaScript, Python, VBScript

API & Microservices Testing: Postman, REST Assured, SoapUI, Bruno

CI/CD & Version Control: Git, GitLab, Azure DevOps, Jenkins, Docker, Kubernetes

Test Management & Reporting: JIRA, HP ALM, Extent Reports

Databases: PostgreSQL, MySQL

Performance Testing: JMeter, BlazeMeter

Agile & SDLC Expertise: SAFe, Agile(Scrum, Kanban), Waterfall

Defect Management & Reporting

Risk Assessment & Mitigation

Additional Qualification

Certifications:

ISTQB Certified Tester – Foundation Level
Test Automation Strategy and Execution
Scrum Master Accredited Certification
